Weather:	Mild & Clear
Executive Summary:	Page 3

SKY HIGH TRAFFIC SURVEYS

A SUBSIDIARY OF SKY HIGH PLC

Executive Summary

Survey Description

Sky High Traffic Surveys, on behalf of Cole Easdon conducted a manual turning count at Coity Road in Bridgend, over the times as outlined on page 2.

Conduct of Survey

In order to address the required Health and Safety issues and Quality issues involved in the chosen survey method an assessment was performed at each required site before the survey commencement.

The necessary equipment and manpower was then installed in readiness for the survey start time.

Monitoring

Appropriately trained supervisory personnel conducted Health and Safety checks and Quality output checks at set intervals throughout the whole of the survey period.

Observations / Incidents

Traffic was observed to be free-flowing throughout the survey. No queuing traffic was recorded.

Analysis

Formal methods of analysis for the survey were undertaken. The high quality of survey data ensured the relevant analysis was performed without delay. Prescribed quality checks were introduced at relevant stages of the process.

The data element of the report is contained on the attached Excel spreadsheets with associated site plans.

Summary

The survey was conducted efficiently and without incident in accordance with the Company Health and Safety policy and the Quality Management System policy.
